EC2B Series Control Boxes (Flameproof & Increased Safety)

Complies with IECEx, ATEX, Ex-CCC, UL/c-UL and TIIS. Ideal for use in factories.

- Corrosion resistant stainless steel enclosure.
- Applicable in areas where explosive gases/steam exist including hydrogen and acetylene, and environments subject to dust (ATEX, IECEx, Ex-CCC).
- Available with a variety of switches/pilot lights and enclosures.
- Available for global applications
  Global: IECEx
  North America: UL/c-UL
  Europe: CE/ATEX
  China: Ex-CCC
  Japan: TIIS
- Degree of protection: IP65 (IEC 60529), Type4X (UL)

Specifications

Degree of protection	IP65 (IEC60529), Type 4X (UL)
Housing Material	Stainless steel (SUS304)
Standard Coating *	5Y7/1 (semi gloss) melamine baking (coating thickness: 10 µm) 1-column: Outside coating 2-, 3-, 4-column: Inside and outside coating
Rated Insulation Voltage	600V (with pilot light or ET2A-8PE screw terminal block: 500V) Meter AC input: 300V Meter DC input: 150V
Insulation Resistance	100 MΩ minimum (500V DC megger)
Operating Temperature	–20 to +50°C (no freezing)
Operating Humidity	45 to 85% (no condensation)
Altitude	2000m maximum

* Special coating, buffing (#400), and special color are possible.
* Contact IDEC for details.

Wiring	
N	No wiring

Control Unit Terminal	
C	Standard screw terminal
F	Finger-safe screw terminal

Standard model

Control Unit Nameplate	
0	No nameplate
Blank	With nameplate

Certification	
GL	IECEx/ATEX/ Ex-CCC certified
U	UL/c-UL IECEx/ ATEX certified
Blank	TIIS certified

Standard control box

- Specify the Part No. when ordering standard control boxes.
- For control unit specifications and part numbers, see pages 13 to 17. For cable lead-in fitting specifications, see page 9. For specifications of control unit nameplate and emergency stop switch nameplate sticker, see page 23.
- If a control unit nameplate or emergency stop switch nameplate sticker is not required on standard control boxes, add "0" after the Part No.

Example: EC2B-1102BF2NC10

Custom assembled control box

- If the required control units, accessories, and cable lead-in fittings are not standard specifications, and if control box nameplate (NP) is required, specify the required specifications on the Specification Sheet on pages 29 to 30.
- TIIS certified models: the model and number of control units that can be installed depend on the size of control box. See page 24 for TIIS certified products and specify the control unit configuration.

Standard and custom assembled control boxes

- Part No. is shown on control boxes as below.

TIIS certified

TIIS certified part no. (see page 24.)

Part No. Example
Wall mount
Part No: EC2B-1102BF2NF2
Part No. on control box: EC2B-1102-F

IECx/ATEX/Ex-CCC certified

EC2B-□□□□-GL

Part No. Example
Part No: EC2B-1102BM3NC3-GL
Part No. on control box: EC2B-1102-GL

UL/c-UL, IECEx/ATEX certified

EC2B-□□□□-U

Part No. Example
Part No: EC2B-1102BN2F4-U
Part No. on control box: EC2B-1102-U

- See below for the symbols of control units.

(PL) : Pilot light
(PB) : Pushbutton
(ES) : Emergency stop switch
(SS) : Selector switch/Key selector switch
(M) : Meter
(BZ) : Buzzer
(VR) : Variable Resistor
(BP) : Control Unit Mounting Hole Plug

- Specify terminal style code in place of in part no. C (standard screw terminal), F (finger-safe screw terminal)
- Contact IDEC for custom assembled control boxes.

* C terminal style (exposed screw terminal) and F terminal style (finger-safe screw terminal) have different TIIS certification numbers.

Cable Lead-in Fittings

Wall Mount Reducers

Reducers installed at the bottom of the control box are as follows:

1 column: 1 reducer
2 columns: 2 reducers
3 columns: 3 reducers
4 columns: 4 reducers
Material: brass (nickel-plated)

The following optional reducers can also be installed.

Control Box Style	Part No.	Thread Size	Symbol	Approval		
				IECEx ATEX Ex-CCC	UL c-UL	TIIS
1 column (1 to 3 control units) 2, 3 columns (2, 3 control units)	EC9E-H31 *1	G1/2 (16)	F1	○	—	○

●: Standard reducer
○: Except for standard reducer

- Specify the reducer certification in place of □.

*1 E: IECEx, ATEX, Ex-CCC
Blank: TIIS certified

*2 E-UL: IECx/ATEX, UL/c-UL certified
Blank: TIIS certified

- The value in ( ) is the nominal designation of the applicable metal conduit (JIS C 8305)

Pole Mount (for TIIS certified model only)

Packing Type Cable Lead-in Fitting

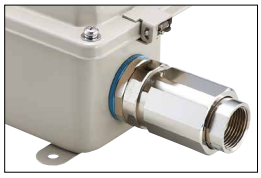
Only one cable can be lead in.

Three different packings are available for 1- , 2-, and 3-column.

Material: Brass (nickel-plated)

Box Style	Part No.	Packing	Cable Diameter D (mm)	Symbol
1 column	EC9E-S10	R12	ø8 ≤ D ≤ ø12	SF
		R16	ø12 < D ≤ ø16	
		R20	ø16 < D ≤ ø20	
2, 3 column	EC9E-S20	R18	ø14 ≤ D ≤ ø18	
		R22	ø18 < D ≤ ø22	
		R26	ø22 < D ≤ ø26	

Flameproof Packing Type Cable Lead-in Fittings (for TIIS certified model only)

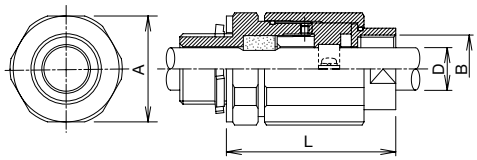


Used to lead in rubber and plastic cables.

Material: Brass (nickel-plated)

Flameproof packing type cable lead-in fitting	Applicable cable diameter D (mm)	Symbol	Dimensions (mm) A	B	L
HPN21 R8	ø6 ≤ D ≤ ø8	H1	36	G1/2 (16)	67 to 70.5
HPN21 R10	ø8 < D ≤ ø10	H2			
HPN21 R12	ø10 < D ≤ ø12	H3			
HPN22 R14	ø12 < D ≤ ø14	H4	40	G3/4 (22)	67 to 70.5
HPN22 R16	ø14 < D ≤ ø16	H5			
HPN33 R18	ø16 < D ≤ ø18	H6	50	G1 (28)	77.5 to 81
HPN33 R20	ø18 < D ≤ ø20	H7			
HPN44 R23	ø20 < D ≤ ø23	HA	58	G1 1/4 (36)	80.5 to 84
HPN44 R26	ø23 < D ≤ ø26	HB			

- HPN44 cannot be used for 1, 2, or 3 control units/1 column.
- The dimension of B in ( ) is the nominal designation of the applicable metal conduit. (JIS C 8305)
- When ordering TIIS certified model, specify the part no. of flameproof packing type cable lead-in fitting.



* For IECEx/ATEX/Ex-CCC, UL/c-UL certified control boxes, use cable lead-in fittings that are commercially available.

Terminal Blocks

A terminal block is not supplied with the standard control boxes (without wiring). When wiring inside the control box is required, specify the wiring circuit.

The terminal block type used on the control boxes with wiring depends on the terminal style of the control unit.

C terminal style (exposed screw terminal)

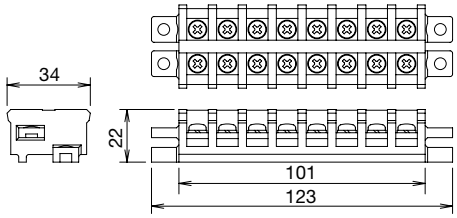
[Applicable terminal block]

Screw terminal: ET2A-8PE (material: polyamide)

Certification numbers:

IECEx TUR 15.0043U

TÜV 15 ATEX 7799U



All dimensions in mm.

F terminal style (finger-safe screw terminal)

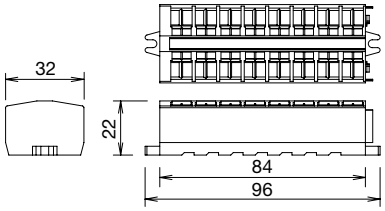
[Applicable terminal block]

IP20 clamp terminal: 264-238 (WAGO) (material: polyamide)

Certification numbers:

IECEx PTB 04.0003U

PTB 98 ATEX 3129U



All dimensions in mm.

The number of terminal blocks, poles, and the installation direction that can be installed on the control box are as follows:

Pilot Light Specifications

Rated Insulation Voltage (Ui)	500V
Rated Operating Voltage (Ue)	6, 12, 24V AC/DC
	100/110, 115, 120, 200/220 230, 240, 380, 400/440, 480V AC
Impulse Withstand Voltage (Uimp)	4kV
Insulation Resistance	100 MΩ minumum (500V DC)
Frequency	50/60Hz
Power Consumption (approx.)	0.3W (24V AC/DC)
	1.5W (100/110V AC)
Life (reference value)	Approx. 40,000 hours

- Because the built-in LED lamp is a high-luminance type, the lamp may light dimly due to induction even when the power is off.

Switch Specifications

Contact Resistance	50mΩ maximum (initial value)	
Impulse Withstand Voltage (Uimp)	6kV	
Insulation Resistance	100MΩ minimum (500V DC megger)	
Short-circuit Protection	250V/10A fuse (Type aM IEC60269-1/IEC60269-2)	
Conditional Short-circuit Current	1,000A

	Selector Switch	250,000 operations minimum (switching frequency 900 operations/h)
	Key Selector Switch	250,000 operations minimum (switching frequency 900 operations/h)
	Emergency Stop Switch	50,000 operations minimum (switching frequency 900 operations/h)
Minimum Force Required for Direct Action	Emergency Stop Switch	60N
Minimum Operator Stroke Required for Direct Opening Action	Emergency Stop Switch	7.0mm
Maximum Operator Stroke	Emergency Stop Switch	9.0mm

- Contact bounce
  Contacts will bounce during operation of pushbuttons and selector switches (reference value: 20 ms). Be sure to take contact bounce time into consideration when designing a control circuit.
- Replacing the control units, nameplates, padlock covers, and LED lamps by users affect the explosion-proof performance which is not guaranteed. Contact IDEC when replacement is necessary.

Contact Ratings

IECEx/ATEX/Ex-CCC, TIIS certified

Rated Insulation Voltage (Ui)			600V			
Rated Thermal Current (Ith)			10A (*)			
Rated Operating Voltage (Ue)			24V	120V	240V	500V
Rated Operating Current (Ie)	AC 50/60Hz	Resistive Load (AC12)	10A (*)	10A (*)	6A	2.8A
		Inductive Load (AC15)	10A (*)	6A	3A	1.4A
	DC	Resistive Load (DC12)	8A	2.2A	1.1A	—
		Inductive Load (DC13)	4A	1.1A	0.55A	—

* Up to 2 contacts (per control unit): 10A
  3 contacts (per control unit): 9A
  Minimum applicable load: 3V AC/DC, 5 mA

Applicable operating locations may vary according to operating conditions and load types.

- TÜV ratings (emergency stop switches)
  AC-15 250V/3A
  DC-13 125V/1.1A
- UL/c-UL ratings: 600V/10A

Buzzer Specifications (EC9F-Z)

Rated Insulation Voltage (Ui)	250V
Rated Operation Voltage	110V AC, 220V AC (50/60Hz)
Time Rating	10 minutes
Sound Pressure (at 1m)	80dB minimum
Power	8VA maximum

- If the sound continues longer than the time rating, the internal parts may overheat and explosion-proof characteristics may be impaired.

Variable Resistor Specifications (EC9E-R)

Rated Power	1W or 2.5W (at 40°C)
Resistance Range	1, 2, 3, 5, 10kΩ Tolerance: ±10%, Characteristics: Linear
Insulation Resistance	100MΩ minimum (500V DC meggar)

- To maintain stable performance for a long period of time, use only up to about 50% of the rated power capacity.
- The variable resistor is available on control boxes with wiring.

Meter Specifications (EU2B-YM/EC9F-M)

Accuracy Class		2.5 (JIS)
Insulation Resistance		100 MΩ minimum (500V DC megger)
AC Ammeter	Rated Insulation Voltage (Ui)	300V
	Operation	Moving core
	Impulse Withstand Voltage (Uimp)	4kV
	Power Consumption	1VA
	Measurement	5A, 10A, 30A, 50A, etc
	Input (CT Ratio)	1A, 5A
	Extended Memory	3 times, etc
DC Ammeter	Rated Insulation Voltage (Ui)	150V
	Operation	Moving coil
	Impulse Withstand Voltage (Uimp)	2.5kV
	Input	0 to 10V DC, 4 to 20mA DC, etc
	Power Consumption (DC ammeter)	0.01W
	Power Consumption (DC voltmeter)	1mA

- Use a commercially available CT (current transformer) for AC ammeters with consumption current of 10A minimum. Install the CT in a non-hazardous location.
- AC and DC ammeters other than listed above are also available upon request, such as extended scale or red pointer.

Pointer Zero Adjustment and Red Pointer Adjustment

- Using a flat screwdriver, turn the zero adjustment pointer screw and the red pointer screw (see below).
- Zero adjustment is possible only on AC ammeters. On other meters such as DC voltmeters, DC ammeters, and tachometer, zero adjustment is not possible.

C	Standard screw terminal
F	Finger-safe screw terminal

∗ Marked on box sizes 11, 21, and 31.

⚠ Safety Precautions

- Use explosion-proof electrical equipment that are applicable for use in hazardous areas (potentially explosive atmosphere where explosive gas or vapor may exist), otherwise explosion or fire hazard may result.
- EC2B control boxes can be installed only in zones 1 and 2. Do not use in zone 0. In North America, the EC2B can be installed in Division 2 areas, but cannot be installed in Division 1 areas.
- Turn power off to the EC2B control box before installation, removal, wiring, or maintenance, otherwise explosion, fire hazard, or electric shock may result.
- Special skills and knowledge of explosion protection, electric system installation, and relevant laws/regulations are required to transport, install, wire, operate, repair, and inspect the EC2B control box. People without such expertise must not use the EC2B control box, otherwise damage or accident may result.
- Do not modify the EC2B, otherwise damage or accident may result.
- Do not use a damaged EC2B control box, otherwise damage or accident may result.
- When connecting external devices, make sure that each cable is connected to the correct terminal, otherwise electric shock, fire hazard, or explosion may result.
- Use wires of a proper size to meet voltage and current requirements. Incorrect wiring may cause abnormal temperature rise and lead to fire hazard and explosion.
- Connect the grounding terminal to a proper ground, otherwise electric shock, fire hazard, or explosion may result.
- Do not sit on or hang from the EC2B control box, otherwise damage, personal injury, or accident may result.
- Do not open the lid of the EC2B control box when it is energized, otherwise electric shock, fire hazard, or explosion may result.
- Operate the EC2B control box at the rated current and voltage specified in this catalog, otherwise short-circuiting, fire hazard, or explosion may result.
- When measuring the insulation resistance of the EC2B control box, make sure that potentially explosive atmosphere of explosive gas or vapor does not exist in the vicinity, otherwise explosion may result. Also, do not touch the terminals without paying attention, otherwise electric shock will result.
- Do not place any obstacles in front of the nameplate.
- Do not remove the nameplate.
- When opening the lid for wiring, maintenance or inspection, make sure that substances such as dust, concrete powder, or metal powder do not enter inside the box, otherwise contact failure or insulation failure may result.
- Do not drop the EC2B control box during transportation.
- Be sure to open the carton the right way up, otherwise damage or personal injury may result.
- Check that the product is what you have ordered. Using an incorrect model might result in malfunction or accident.
- Stop operation immediately if abnormal operation occurs. Otherwise, a secondary accident may occur.
- The surface temperature of the EC2B control box may become extremely hot during operation. Before maintenance or inspection of the EC2B, be sure to wear gloves to prevent burning your hand.

Operating Instructions

- Notes on Use
- Installation Area
- Do not install the EC2B control box in an environment where more than IP65 protection degree (more than Type 4X in North America) is required.
- Use the EC2B control box under ambient temperature of –20 to +50°C. If the control box is exposed to direct sunlight and the surface temperature may rise above 50°C, provide a shade (see page 22) to keep the surface temperature below 50°C.
- Installation
- Wall mount
  Use four M6 bolts for 1-column, four M8 bolts for 2- and 3-column, or other methods with equivalent strength to install the control box. Mounting tab thickness is 1.5mm for 1 column and 2mm for 2, 3, and 4 columns. (See dimensions) (See dimensions.)
- Pole mount
  Use four M12 bolts or other methods with equivalent strength to install the control box.
  Use flat washers to prevent scratches on the pole base coating.
- If bolts become may loose due to vibration, use spring washers.
- If bolt corrosion is anticipated, use anti-corrosion bolts or other countermeasures.
- Notes on Emergency Stop Switches
- When using the emergency stop switches on safety-related parts of the control system, observe safety standards and regulations of the relevant country or region. Also be sure to perform a risk assessment before operation.
- Opening/Closing the Lid
- Use a Philips screwdriver to loosen lid mounting screws. While holding the unhinged side, open the lid slowly without exerting excessive force on the hinge.
- Before closing the lid, make sure of the following:
- No foreign substances are on the packing or joint surfaces.
- No displacement of the waterproof packing.
- Wires are not caught between the joint surfaces.
- Next, close the lid slowly and tighten the screws to a proper torque of 1.6 to 2.4 N·m.

Operating Instructions

Limitation of the Operating Current

- Major heat sources comes from the wiring which is connected to the control box. Therefore, not only the operating current but wiring conditions (size, no. of wires, no. of wire bundles) may cause temperature rise. When wiring, observe the following conditions.

  · Stranded wire: 1.5 to 2.5 mm^2 (UL-c-UL certified)
  1.25 to 2.5 mm^2 (other)
  solid wire: ø1.2 to ø1.6 mm (16 to 14 AWG)

  · Maximum no. of wires per bundle: 16

  · Maximum operating current: 10A
- When using the control box under operating environment of 40°C minimum, use a heat resistant cable of 70°C minimum.
- Determine the operating current so that the total heat value of 1 wire bundle is below 300 [A^2 × wires]. Also, when calculating the heat value, take the current fluctuation (10%) into consideration.

[calculation example: EC2B-41∗∗B (8 circuit)]

①Apply 10A to 1 circuit, 1A to the remaining 7 circuits:

{(10A × 1.1)^2 × 2 wires} + {(1A ×1.1)^2 × 14 wires} ≈ 259
(can be used because < 300)

②Apply 10A to 1 circuit, 2A to the remaining 7 circuits:

{(10A × 1.1)^2 × 2 wires} + {(2A × 1.1)^2× 14 wires} ≈ 310
(cannot be used because > 300)

2. See the table below for the allowable operating current when applying current evenly to each control box.

Control Box Part No.	Max. No. of Circuits	Max No. of Wires per Bundle (∗1) [wires] ([wires]×[bundle])		Allowable Operating Current (reference) (∗2)
		Without terminal blocks	With terminal blocks	
EC2B-11□B□	3	16 (16×1)	8 (8×1)	7A
EC2B-21□B□	6	16 (16×1)	8 (8×1)	5A
EC2B-31□B□	9	16 (16×1)	8 (8×1)	4A
EC2B-41□B□	12	16 (16×1)	16 (16×1)	3A
EC2B-51□B□	15	16 (16×1)	16 (16×1)	3A
EC2B-22□B□	12	32 (16×2)	16 (8×2)	5A
EC2B-32□B□	18	32 (16×2)	16 (8×2)	4A
EC2B-42□B□	24	32 (16×2)	32 (16×2)	3A
EC2B-52□B□	30	32 (16×2)	32 (16×2)	3A
EC2B-23□B□	18	48 (16×3)	24 (8×3)	5A
EC2B-33□B□	27	48 (16×3)	24 (8×3)	4A
EC2B-43□B□	36	48 (16×3)	48 (16×3)	3A
EC2B-53□B□	45	48 (16×3)	48 (16×3)	3A
EC2B-63□B□	54	48 (16x3)	48 (16x3)	3A
EC2B-64□B□	72	64 (16x4)	64 (16x4)	3A

∗1: Make sure that the number of wires per bundle is a maximum of 16 by reducing the wiring or by jumper wiring. The maximum number of wires per bundle may need to be further reduced depending on the wire size, lead-in fitting, or conduit size.

*2: The allowable current value (reference) when applying current evenly to all circuits of the maximum number of circuits.

Wiring Construction

- Observe the laws and regulations in each country concerning wiring construction.
- Use cable wiring or metal conduit wiring for installation in hazardous locations. If foreign objects or water may enter the box, install a sealing fitting near the cable entry of the box and seal the control box using a compound.
- Standard type control boxes do not contain a terminal block. Wire the control units directly.

Operating Instructions

Wiring

Applicable Wires

Stranded wire: 1.25 to 2.5 mm^2, solid wire: ø1.2 to ø1.6 mm (AWG16 to 14)

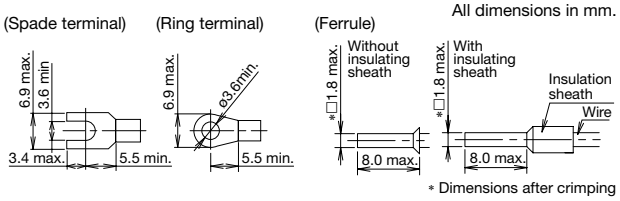
- Do not connect more than 2 wires to the same terminal.

Applicable crimping terminal

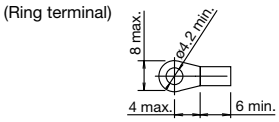
- Ring terminals cannot be used for EU2B control units with IP20 finger-safe terminals.
- Ring and spade terminals cannot be used for IP20 clamp type terminal blocks.
- When connecting 2 ferrules to an EU2B control unit, use ferrules without insulating sheath.

For control units EU2B

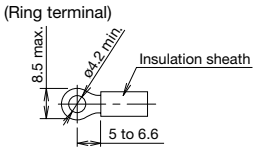
All dimensions in mm.



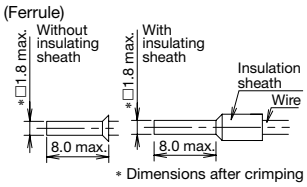
For control units EC9



For screw terminal ET2A-8PE



For IP20 clamp terminal (WAGO: 264-238)



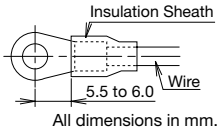
· Recommended crimping terminal (WAGO)
Ferrule with insulating sheath: 216-204
Ferrule without insulating sheath: 216-104
Crimping plier: 206-204

Recommended Tightening Torque

EU2B control units (M3.5) and ET2A-8PE terminal block (M4): 1.0 to 1.3 N·m

⚠ Warning

Incorrect wiring may cause fire hazard. Observe the following conditions.



All dimensions in mm.

- Be sure to install an insulating sheath on the crimping terminal or the crimping terminal with insulation.
- When connecting solid wires or stranded wires directly, strip the insulation as mentioned below, and insert the wire all the way in.

  EU2B Control units: 8.6 mm maximum
  IP20 crimping terminal: 8 to 9 mm

- When using stranded wires, make sure that there are no wire whiskers.
- Make sure that the spade crimping terminals and ferrules are inserted all the way in.
- Use insulated ring terminals for the ET2A-8PE terminal block. Use only applicable crimping terminals and do not directly connect stranded wires or solid wires.

Operating Instructions

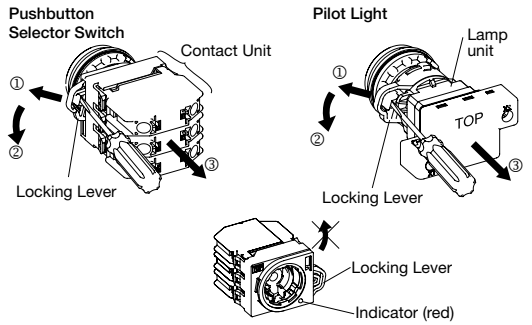
Removing and Installing the Contact Unit/ Lamp Unit

Removing the Contact Unit/Lamp Unit

To remove the contact unit or the lamp unit from the operator, pull the protruding part of the locking lever outwards as shown in the figure below (using a screwdriver, etc.) and turn it to the left. The contact unit or lamp unit can be pulled out.

Emergency stop switch

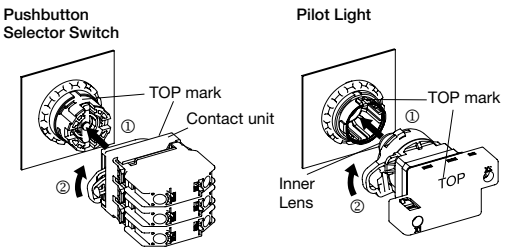
Note that when contact unit is detached from the operator part, the NO contact is closed and NC contact is open. Do not move the lock lever when the contact unit is detached (red indicator is protruded), otherwise the switch will be damaged.



Installing the Contact Unit/Lamp Unit

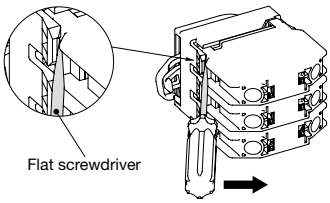
To install the contact unit, place the TOP marking on the operator and the TOP marking on the contact block adaptor in the same direction, and then attach the contact unit to the operator as shown in the figure below. Then turn the locking lever to the right. Follow the same procedure when installing the lamp unit.

- When installing the lamp unit, check that the inner lens is not loose. Note that the contact units of the emergency stop switch and pushbutton/selector switch are not interchangeable.



Removing the Contact Block

To remove the contact block, insert a flat screwdriver under the latch of the contact block adaptor and disengage the latch as shown in the figure below.



- When installing the contact block after maintenance or wiring, make sure that the contact configuration is correct. Installing the contact block in an incorrect position or incomplete installation may cause malfunction of the switch.
- Make sure to remove the contact block from the operator before installing the contact block to the contact block adaptor. Also make sure that the contact block is correctly installed to the contact block adaptor before attaching the operator. Do not install the contact block adaptor with the operator attached. Otherwise, malfunction may result.

Protective Grounding

Protective grounding must be performed according to the installation environment and rating requirements. Observe laws and regulations set by each country.

- Connect the M4 grounding terminal of the EC2B control box to a proper ground (grounding resistance 10Ω maximum). When operating the EC2B control box by connecting to circuits of 300V or below, the grounding resistance must be 100Ω maximum.
- When using cables, connect one of the cable cores to the grounding terminal in the enclosure.
- If the grounding terminal in the enclosure cannot be used, use the M4 grounding terminal on the outside of the enclosure for wall mount, or the M6 grounding terminal of the pole base for pole mount.
  Recommended tightening torque:
  M4: 1.0 to 1.3 N·m
  M6: 3.9 to 5.4 N·m

For grounding, use appropriate wires (size, material, insulation) that can tolerate the expected maximum grounding current. Be sure to protect the grounding wire with protection, such as metal conduit, from external damage.

Maintenance and Inspection

- Observe laws and regulations set by each country.
- Do not open the lid when inspecting the EC2B while it is energized.
- Never disassemble the control box.
- Do not use tools that cause sparks during maintenance and inspection.
- When using measuring devices, use explosion-protected types.
- When the EC2B needs to be disassembled or assembled for maintenance or repair, contact IDEC.

Disposal

Observe laws and regulations set by each country concerning refuse disposal.

Ordering Terms and Conditions

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

1. Notes on contents of Catalogs

(1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
Also, durability varies depending on the usage environment and usage conditions.

(2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.

(3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.

(4) The content of Catalogs is subject to change without notice.

2. Note on applications

(1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.

(2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.

(3) When using IDEC products, be cautious when implementing the following.

i. Use of IDEC products with sufficient allowance for rating and performance

ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails

iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications

(4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.

(5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.

i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health

ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems

iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference
If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

4. Warranty

(1) Warranty period

The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.

(2) Warranty scope

Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.

i. The product was handled or used deviating from the conditions / environment listed in the Catalogs

ii. The failure was caused by reasons other than an IDEC product

iii. Modification or repair was performed by a party other than IDEC

iv. The failure was caused by a software program of a party other than IDEC

v. The product was used outside of its original purpose

vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs

vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC

viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)

Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

(1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)

(2) Maintenance inspections, adjustments, and repairs

(3) Technical instructions and technical training

(4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
